Firmware Update Instruction

- 1) Login as admin user.
- 2) On the main Menu select firmware update.
- 3) When prompt for the firmware . On the HypTerminal Menu -> Transfer -> Send File

- 4) Browse to the directory where the new firmware is located. Select 1K XModem as shown below. Then Select Send

- 5) Wait until the firmware is transferred successfully, the LCD will show the firmware is being updated (DO NOT OFF THE POWER AT THIS TIME OR ELSE THE RTU WILL NEVER BOOT A GAIN).
- 6) After the firmware is updated the unit will reboot.
